

Find the gradient and y-intercept for each linear relation and sketch the graph.

1. $y = 2x + 1$

Gradient: _____ y-intercept: _____

2. $y = -x + 3$

Gradient: _____ y-intercept: _____

3. $2x + y = 4$

Gradient: _____ y-intercept: _____

4. $x + 2y = 6$

Gradient: _____ y-intercept: _____

Find the gradient and y-intercept for each linear relation and sketch the graph.

5. $y = 3x - 2$

Gradient: _____ y-intercept: _____

6. $3x + y = 3$

Gradient: _____ y-intercept: _____

7. $2x - y = 4$

Gradient: _____ y-intercept: _____

8. $x - 2y = 2$

Gradient: _____ y-intercept: _____

Find the gradient and y-intercept for each linear relation and sketch the graph.

9. $y = -2x - 1$

Gradient: _____ y-intercept: _____

10. $3x + 2y = 6$

Gradient: _____ y-intercept: _____

11. $y = x - 4$

Gradient: _____ y-intercept: _____

12. $2x + 3y = 6$

Gradient: _____ y-intercept: _____

Find the gradient and y-intercept for each linear relation and sketch the graph.

13. $y = -3x + 2$

Gradient: _____ y-intercept: _____

14. $x + y = -2$

Gradient: _____ y-intercept: _____

15. $4x - 2y = 4$

Gradient: _____ y-intercept: _____

16. $3x - 3y = 6$

Gradient: _____ y-intercept: _____
